Profile

Software Engineer with professional experience developing scalable web and mobile applications using JavaScript, TypeScript, React, Next.js, NestJS, Express, and PostgreSQL. Experienced in translating business requirements into production-ready software, deploying applications with Docker, and collaborating in agile development teams. Passionate about backend engineering, cloud technologies, AI-powered applications, and building software that solves real-world problems.

Work Experience

Full Stack Developer Intern, Infi Tech 	2025 – Present Lilongwe, Malawi
- Developed and maintained SaaS web applications using React, Next.js, NestJS and PostgreSQL. - Built REST APIs, authentication systems and business logic for multi-tenant applications. - Containerized and deployed applications using Docker and Dokploy. - Collaborated with senior developers to review requirements and deliver production-ready software. - Debugged and resolved software defects while improving application performance. - Participated in code reviews and agile development processes.	
Developer, Lockie Visuals 	2025 – Present Zomba, Malawi
- Developed responsive web applications using Next.js and Express. - Built reusable UI components and REST APIs. - Implemented authentication and database integrations. - Produced technical documentation and user guides. - Assisted with mobile application development using React Native.	

Education

Bachelor's degree in Computer Science, University of Malawi Grade: Distinction.	2022 – 2026 Zomba, Malawi
Malawi School Certificate of Education, Chipasula Secondary School	2016 – 2021 Lilongwe, Malawi

Skills

Frontend HTML, CSS, TailwindCSS, React, Nextjs	Programming Languages Typescript, Javascript, Python, Java, C++, SQL, Dart
Mobile Application Development Expo, React Native, Flutter, Jetpack Compose,	Database PostgreSQL, Firebase, Supabase, Neon, Prisma
Backend NestJS, Express, NodeJS, REST API, Next-Auth, Microservices	DevOps and Cloud Docker, Kubernetes, Git, Github, Dokploy
Others VMware, Packet Tracer, QGIS, Power BI, MATLAB, MIPS Assembly	

Projects

UNIMA Computing Society Voting Platform

Designed and developed a secure online voting platform for the University of Malawi Computing Society to facilitate transparent digital elections for over **300 registered members**. The system featured secure authentication, role-based access control, candidate management, election configuration, vote validation, and real-time result computation while ensuring that each eligible member could vote only once.

Tulame Medicine Store Management System

Developed a cross-platform pharmacy management system that streamlines medicine inventory, sales processing, customer management, and reporting for retail pharmacies. The application enables pharmacists to efficiently manage stock levels, process sales transactions, monitor inventory movements, and generate business reports through an intuitive mobile interface backed by a scalable REST API.

Certifications

Nextjs App Router Fundamentals , Vercel

Learnt different nextjs concepts through a hands-on implementation of a dashboard that authenticate users, allow them to manage invoices and customers. I learnt concepts like displaying data, mutating it, authentication using next-auth and many more

2025 – 2025
Zomba, Malawi

Introduction to DHIS2, DHIS2

One of my projects required intergration with DHIS2, so i had to do a DHIS2 course to understand the fundamental concepts of DHIS2 like organisation units, data elements, tracker app, etc.

2025 – 2025
Zomba, Malawi

Introduction to java, Sololearn

Learnt alot of java fundamental concepts like variables, data types, flow control (loops and conditional statements), functions and Object Oriented Programming

2023 – 2023
Zomba, Malawi

Seeds for the future, Huawei

Attended a 1 week training organized by HUAWEI where i learnt alot of emerging technologies eg AI, cloud computing, VR, AR, Blockchain e.t.c

Awards

Deans List, University of Malawi

I Scored a GPA of 3.9

2024

Deans List, University of Malawi

I scored a GPA of 3.8

2023

Vice Chancellors Scholarship, University Of Malawi

I scored a GPA of 3.9

2024

Community and Leadership

Comsoc Facilitator

Mentored students in Data Structures and Web Development.

Comsoc Developer

Participated in development of COMSOC election system.
